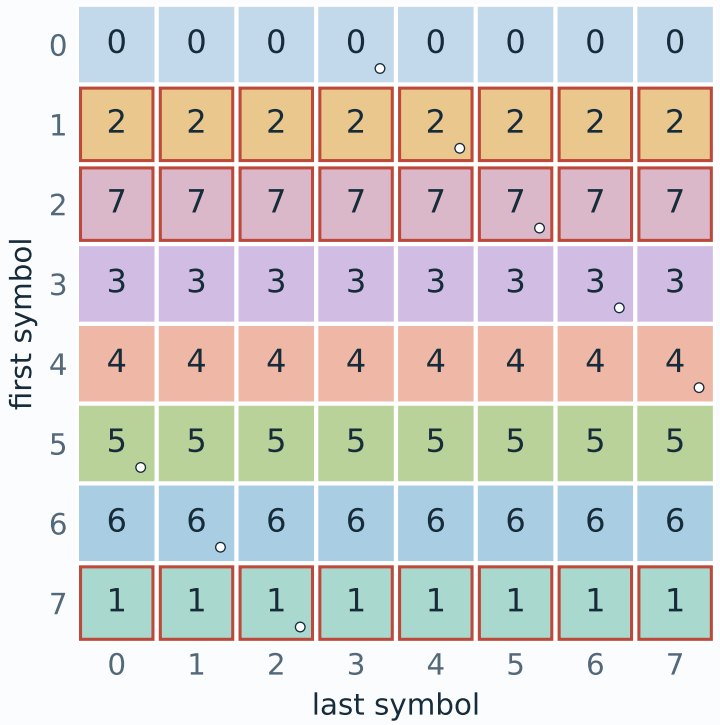
six weights. three broken routes. zero collateral damage.

conditional copy · 632 parameters · case 2 · original astra submission

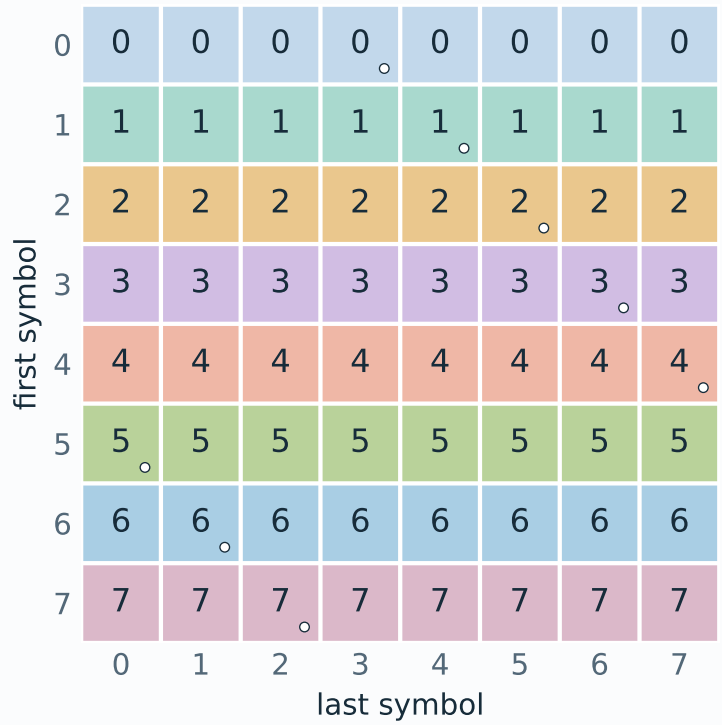
01 / before repair

mode 0: copy first · red borders = wrong



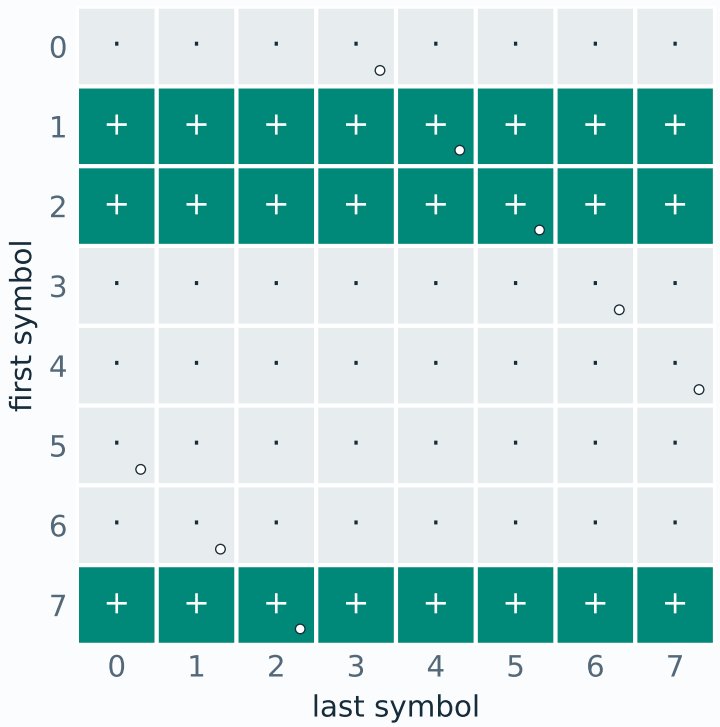
02 / after repair

mode 0: every row now returns its own symbol



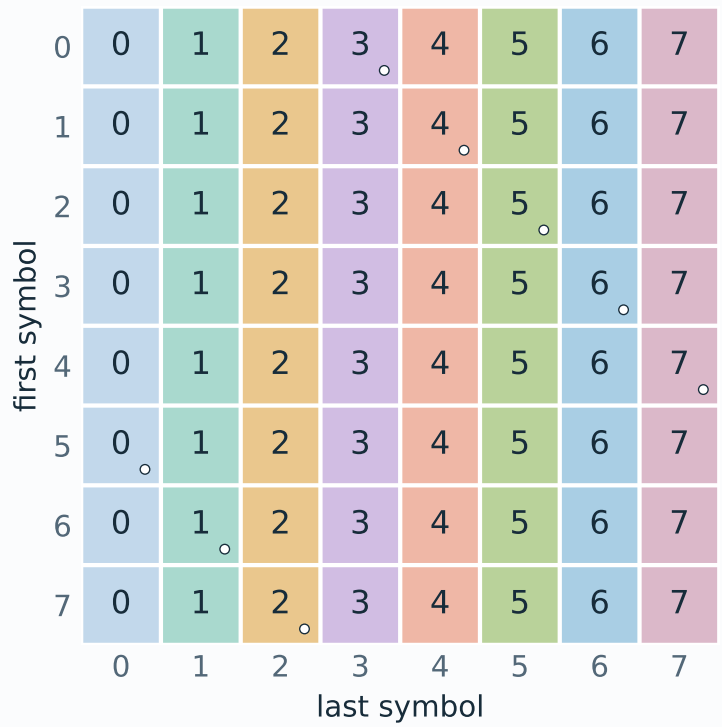
03 / predicted effect = actual effect

only symbols 1, 2, 7 change · + = label changed



04 / other mode stays intact

mode 1: copy last · all 64 predictions unchanged



each cell = one input; numeral / color = predicted symbol. small dots = practice inputs; all other cells were held out.

grids enumerate all 128 legal inputs; damaged-model hidden accuracy: 91/112 → 112/112. constructed toy circuits, not a vision task.
